

ANSWERS Software Service – Programme of Courses 2017

Course	Who Should Attend	Objectives	Dates	Fees (Non Residential)
Introduction to MCBEND	New or inexperienced users of MCBEND	The course is aimed at providing the new or inexperienced user of the software with a broad understanding of the capabilities of MCBEND, a package for radiation transport problems in shield design, dosimetry and industrial applications.	21-24 Feb 2017 & 07-10 Nov 2017 (4 Days)	£2,015 Excl. VAT
Advanced MCBEND	For those with significant experience of MCBEND and who ideally have attended the introductory MCBEND course.	The course is aimed at providing the experienced user of MCBEND with more understanding of the theoretical ideas behind the code and their implementation within the software.	28 Feb-02 Mar 2017 & 14-16 Nov 2017 (3 Days)	£1,685 Excl. VAT
Introduction to MONK	New or inexperienced users of MONK	To provide the new or inexperienced user of MONK for criticality purposes with a broad understanding of the capabilities of the code and hands-on experience of constructing input specifications.	07-10 March 2017 & 03-06 Oct 2017 (4 Days)	£2,015 Excl. VAT
Advanced MONK	For those with significant experience of MONK and who ideally have attended the introductory MONK course.	The course is aimed at providing the experienced user of MONK with more understanding of the theoretical ideas behind the code and their implementation within the software.	14-16 March 2017 & 10-12 Oct 2017 (3 Days)	£1,685 Excl. VAT
MONK Application Masterclass	The course is heavily weighted towards the application of the code and is ideally suited to those who have already attended the Introduction to MONK course.	The course is aimed at providing the experienced user of MONK with the choices and options available to the MONK modeller and how best to use the code for particular applications. There is scope for the applications focus of the course to be tailored to specific organisation requirements.	To be announced (3 Days)	£1,685 Excl. VAT
Introduction to WIMS	New or inexperienced users of WIMS	The course is aimed at providing the new or inexperienced user of WIMS with a broad understanding of the capabilities of the code and hands-on experience of constructing input specifications.	27-31 March 2017 & 16-20 Oct 2017 (5 Days)	£2,550 Excl. VAT
Advanced WIMS	For those with significant experience of WIMS and who ideally have attended the introductory WIMS course.	The course is aimed at providing the experienced user of WIMS with more understanding of the theoretical ideas behind the code and their implementation within the software.	04-07 April 2017 & 31 Oct-03 Nov 2017 (4 Days)	£2,015 Excl. VAT
Introduction to FEAT	New or inexperienced users of FEAT	The course is aimed at providing the inexperienced user of the software with a broad understanding of the capabilities of the code and to teach the efficient use of FEAT in the thermal, fluids and stress engineering areas.	To be announced (4 Days)	£2,015 Excl. VAT
Introduction to RANKERN	New or inexperienced users of RANKERN	The course is aimed at providing the inexperienced user of the software with a broad understanding of the capabilities of RANKERN (a 3D Point-Kernel computer program written for gamma-ray analysis).	To be announced (2.5 Day)	£1,685 Excl. VAT
Introduction to FISPIN	New or inexperienced users of FISPIN	The course is aimed at providing the inexperienced user of the software with a broad understanding of the capabilities of calculation of nuclide inventories.	To be announced (1.5 Day)	£1,300 Excl. VAT

BOOKING FORM

Registration: Please complete the booking form and email to: lydia.smith@amecfw.com
For any enquiries please telephone Lydia Smith 01305 253587/ 01305 253586
